

SECTION 02: QUICKFIX MULTI- COMPARTMENT TRUNKING SYSTEMS

With Multi-Compartment Trunking, dividing fillets are normally supplied spot-welded in position, but can also be supplied loose for fixing on-site by drilling and screwing. Spot welds can be treated with Norgalv paint as an extra on request. Purpose-made trunking can be supplied with conduit entries at pre-determined regular intervals in sides and in dividing fillets.

When trunking is mounted vertically or in the inverted position it is recommended that Cable Supports are fitted.

Bends, Tees, Intersections, etc. are supplied complete with Dividing Fillets. Tees with Top Lids and Intersection Boxes are supplied with fitted Cross-over Bridges.

Example Tee and Bend assemblies with unequal compartments are shown in this section.

Three, four or more compartment trunking is available.

NB. Specialist Gauges

Gauges conform to latest specifications. For specialist requirements, a range of gauges is available on request.

For trunking sizes greater than TK99, alternative lid options, and/or multiple material configurations, please contact your nearest Unitrunk depot and ask about our Non-Standard Trunking range.

*One Cover Strap supplied per 3m trunking length to ensure IP4X compliance. Cover Straps are ONLY required on length to length joins.

**Stainless Steel finish trunking products are supplied with standard nuts, bolts and screwfix lid (instead of Unibolts and turnbuckle fastener lid).
