GLOBAL EXPERTISE

At Unitrunk, we are dedicated to delivering exceptional value through the highest standards of service and support, backed by an innovative range of leading cable management solutions.

With decades of experience working alongside operators, engineers, and design houses, we understand the complexities of operating in a global marketplace. Whether consolidating and shipping large volumes of materials worldwide, providing detailed technical information to product inspectors, or preparing the precise documentation needed for international shipments, our team has the expertise to meet your project's demands.

Our capabilities are further strengthened by our new distribution centre in Hamburg, enabling faster and more efficient service to projects across Europe and into the Nordics. Combined with our global network of trusted partners in strategic locations — including Australia, Belgium, Brazil, Cyprus, Denmark, France, Germany, Ghana, Indonesia, Italy, Ireland, Kazakhstan, Korea, Malaysia, Netherlands, Singapore, Thailand, UAE, UK, USA, and Vietnam — we ensure the delivery of high-quality, reliable cable management solutions, on time, to major projects worldwide.

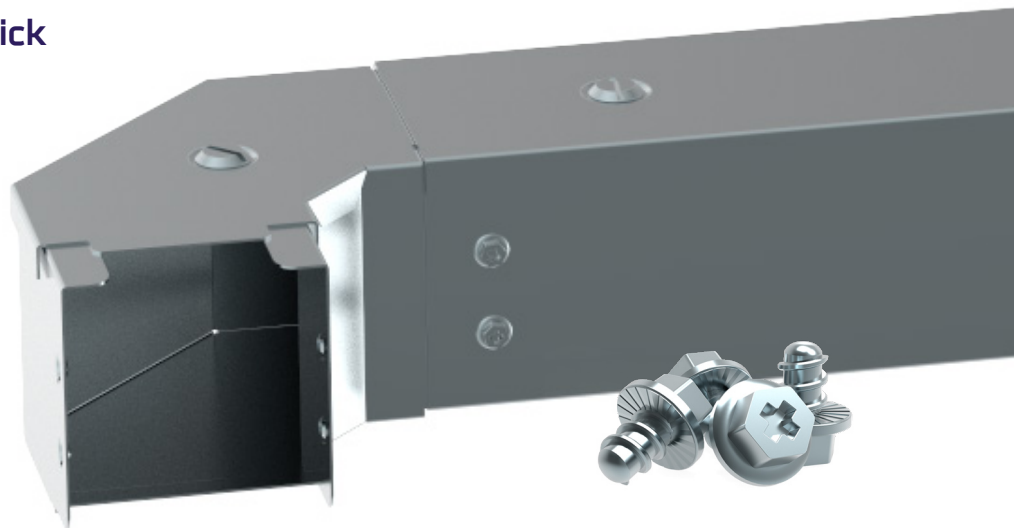

QuickFix

NEW

UNIKLIP® TRAY RANGE DESIGN UPDATE!

We're thrilled to announce an exciting update to our UniKlip® cable tray range - it is now compatible with the innovative **UniBolt!**

Our design team has integrated the clever bolt design, which offers improved functionality and faster installation, into the tray range.

Installers finish jobs at least **3X faster** and save up to **50%** on overall costs using the UniKlip® system.

Strong, reliable and load tested to BS EN 61537 Standards.

The same trusted Unitrunk strength and quality - just faster and easier to install.

MR and HR fittings are supplied with UniBolts. Couplers include UniBolts and UniKlip®, providing greater choice in installation methods.

Load tested to BS EN 61537 standards

Tip

Wherever you see this symbol, it means the product is part of our RIS (Rapid Installation System) range. Choose these for a time saving solution.

QUALITY & STRENGTH YOU CAN TRUST

At Unitrunk, quality is at the core of everything we do. Our products are designed and manufactured in-house to the highest standards, giving you complete confidence that they not only meet but exceed all relevant industry requirements.

We're proud to operate to ISO 9001 quality standards and hold full CE accreditation, ensuring every solution is safe, reliable, and built to last. Alongside this, we've also achieved ISO 14001 Environmental and ISO 45001 Health & Safety accreditations — underlining our commitment to responsible, safe, and sustainable operations.

When you choose Unitrunk, you choose trusted, certified quality every step of the way.

ACCREDITATIONS

Accredited to LUL Standards:

Channel and Support Systems
Cable Basket Tray
Cable Ladder
Lighting Trunking
Standard and Multi Compartment Trunking

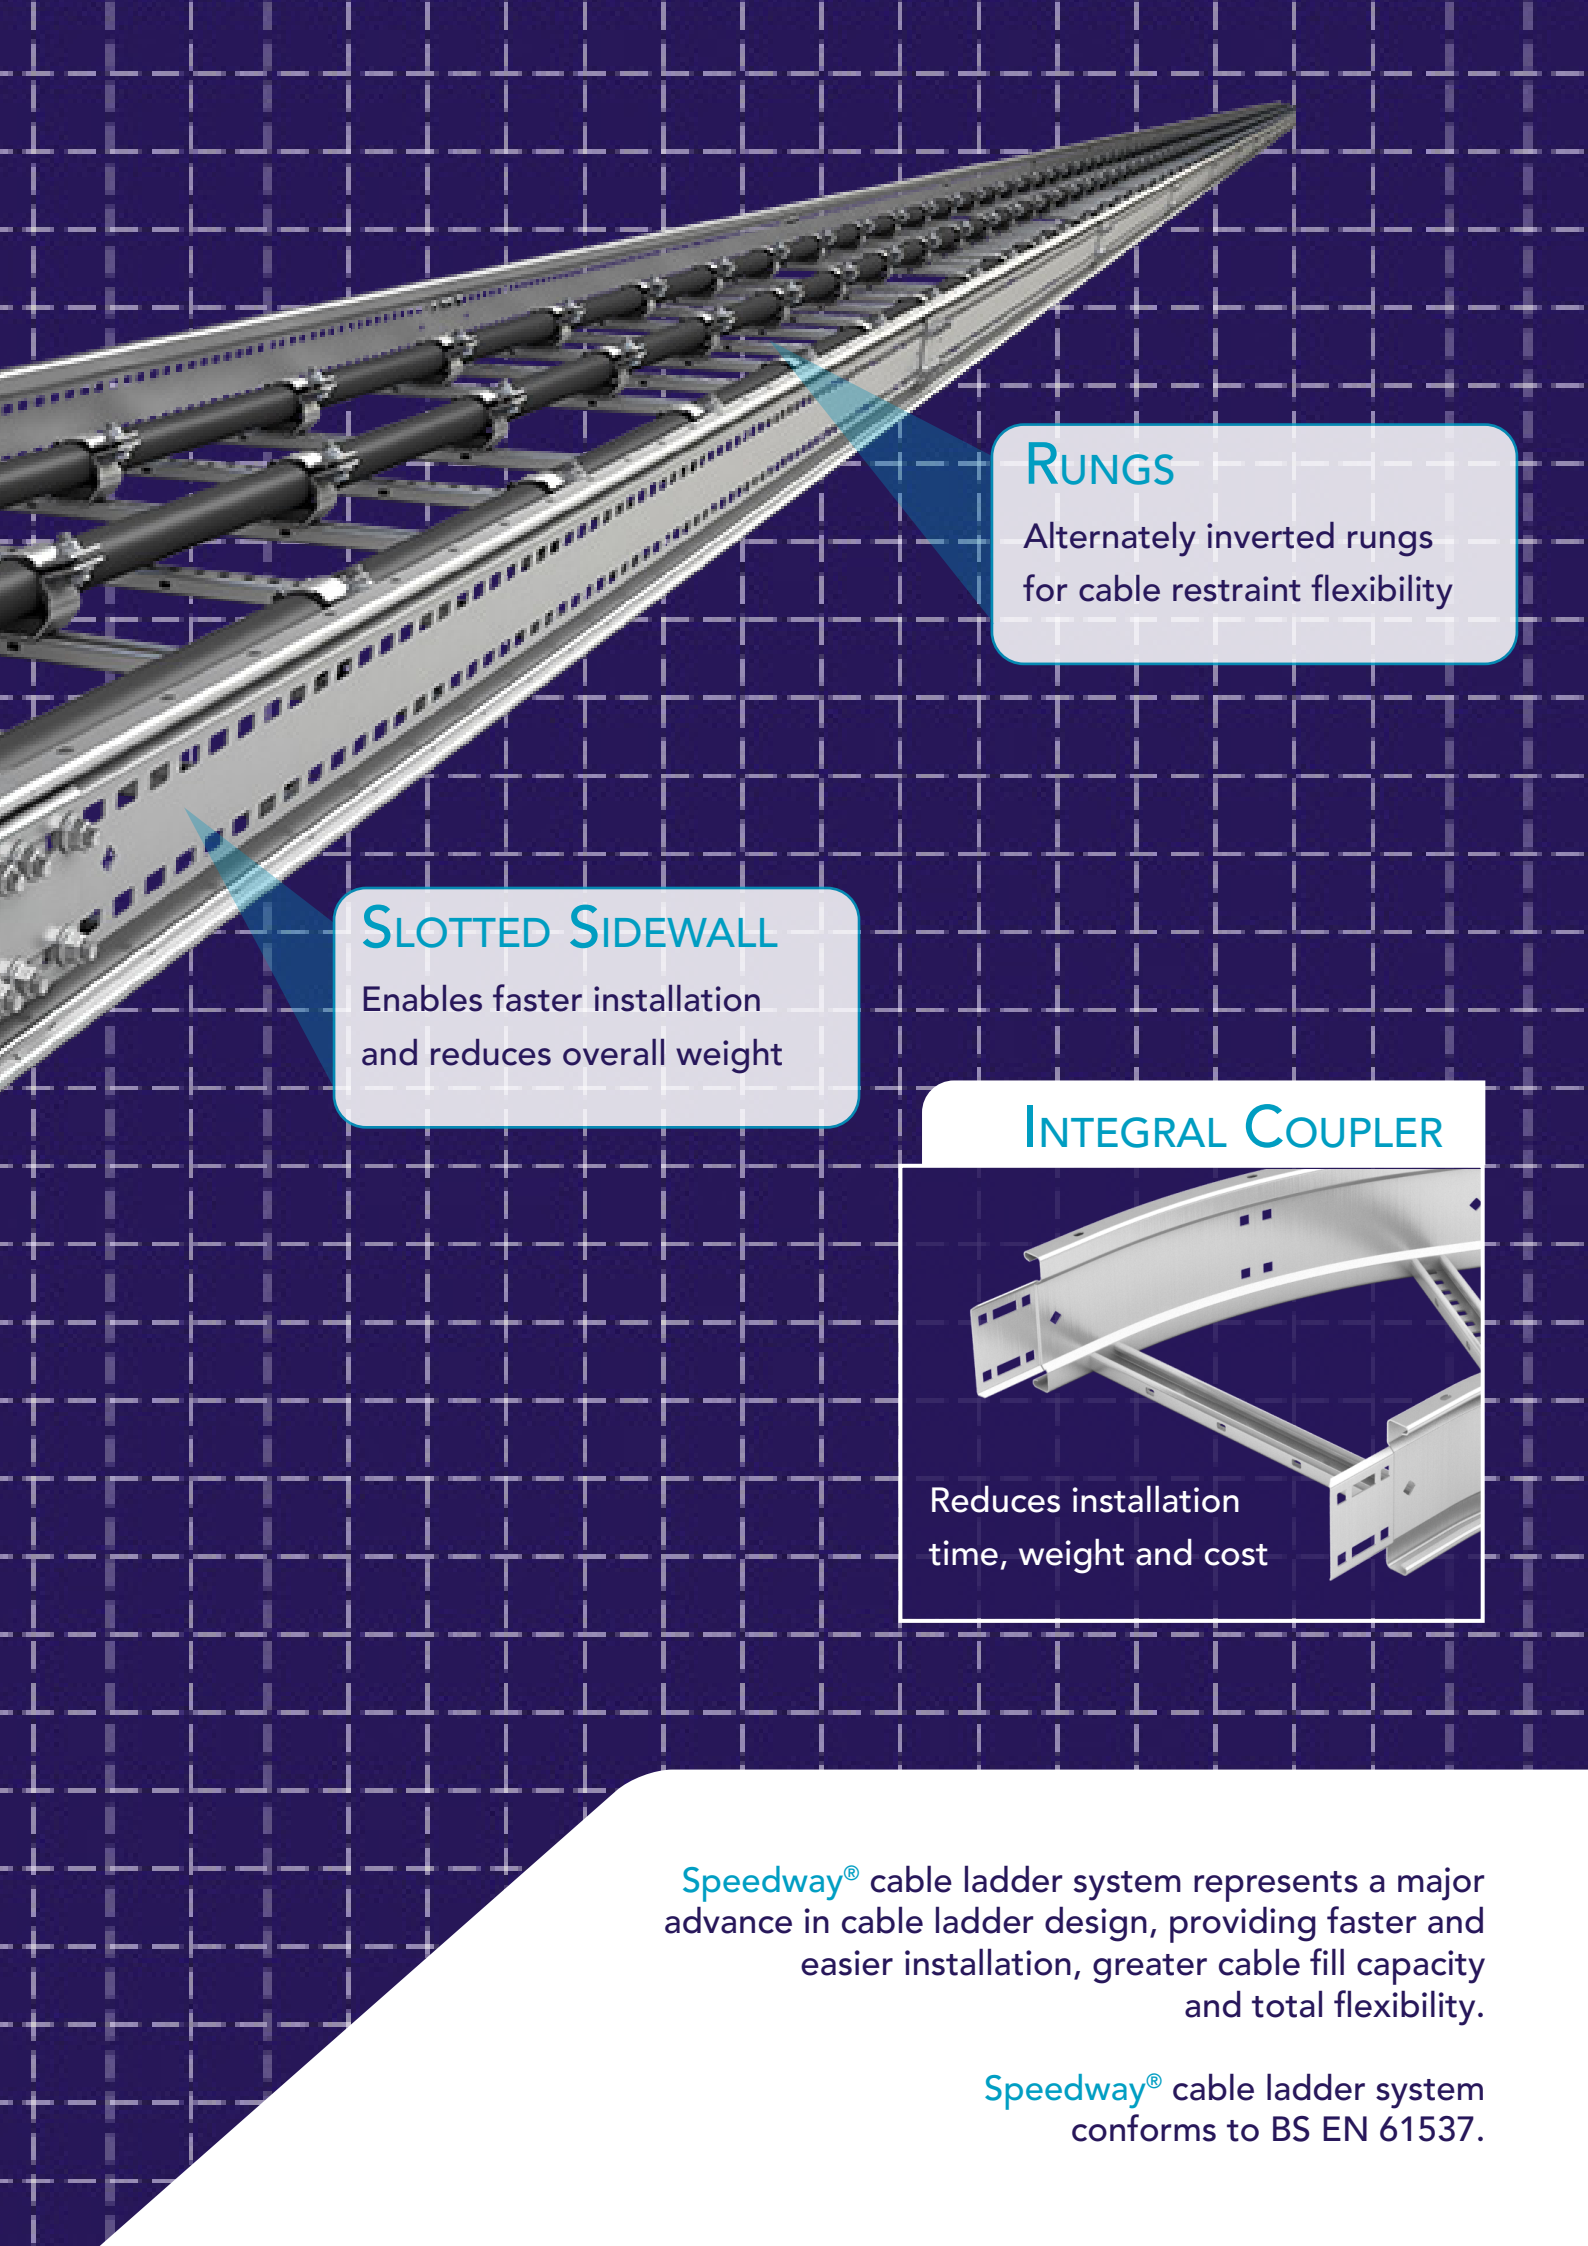

LENGTHS

3m lengths as standard,
6m lengths also available

SPEEDWAY® PROFILE

Unique profile maximises strength
and increases internal load area

RUNGS

Alternately inverted rungs
for cable restraint flexibility

SLOTTED SIDEWALL

Enables faster installation
and reduces overall weight

INTEGRAL COUPLER

Reduces installation
time, weight and cost

Speedway® cable ladder system represents a major advance in cable ladder design, providing faster and easier installation, greater cable fill capacity and total flexibility.

Speedway® cable ladder system
conforms to BS EN 61537.

TESTED TO PERFORM UNDER FIRE

Unitrunk has completed comprehensive fire testing across our cable management product range – achieving E90 fire resistance certification in accordance with DIN 4102-12.

This important milestone confirms our systems' ability to maintain functionality for up to 90 minutes in extreme heat conditions – a crucial requirement for safety-critical installations in sectors like data centres, transport, healthcare and high-rise construction.

At Unitrunk, we're committed to providing cable management solutions that deliver performance, reliability, and compliance – even in the most demanding environments.

Contact our Technical Support team if you would like to know more about the fire testing procedure via TechnicalSupport@unitrunk.co.uk.

FACILITIES

Our newly extended 105,000m² production site includes manufacturing and warehousing facilities and additional marshalling and storage areas, ideal for major projects.

Unitrunk Group resources and facilities include Vantrunk's 10,000m² purpose-built production facility in Warrington, England. Both sites are equipped with state of the art industrial production and processing technology.

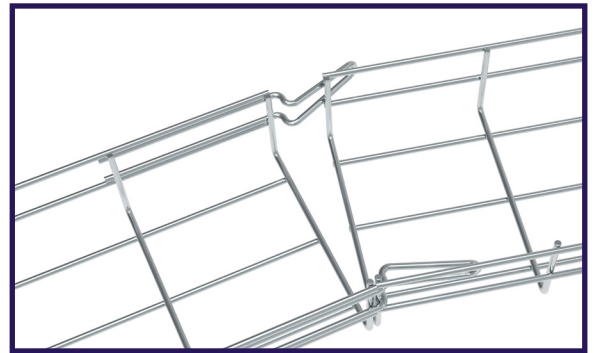

Facilities include:

- R&D
- On site testing to industry standards
- Measurement
- Cutting edge production equipment
- Standards conformance

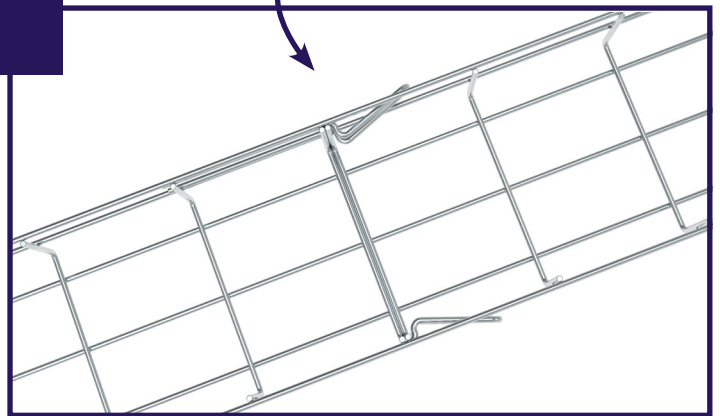

EASYCONNECT® CABLE BASKET SYSTEMS

A strong, yet flexible, solution designed to meet the demands of the power, data and systems cabling installed in modern buildings.

EasyConnect® Cable Basket system adheres to Unitrunk's RIS (Rapid Installation Systems) philosophy, the integral coupler simply pushes together to form a secure joint, no additional couplers or special tools are required.

"CLICK"

EASYCONNECT® TECHNICAL DETAILS

- Overall length of 3000mm
- When two lengths are joined, joint proximity means that the combined length will be 6000mm (perfect for use in modular (off-site) fabrication as this eliminates "basket creep" which can occur with other basket products)
- Manufactured to comply with BS EN 61537, load tested and meets earth continuity requirements of the standard
- Short circuit tested with a fire rating of E90

ACCREDITED TO THE FOLLOWING STANDARDS

LUL ACCREDITATION ID:

1820

EVERYTHING YOU NEED IN
ONE BASKET:

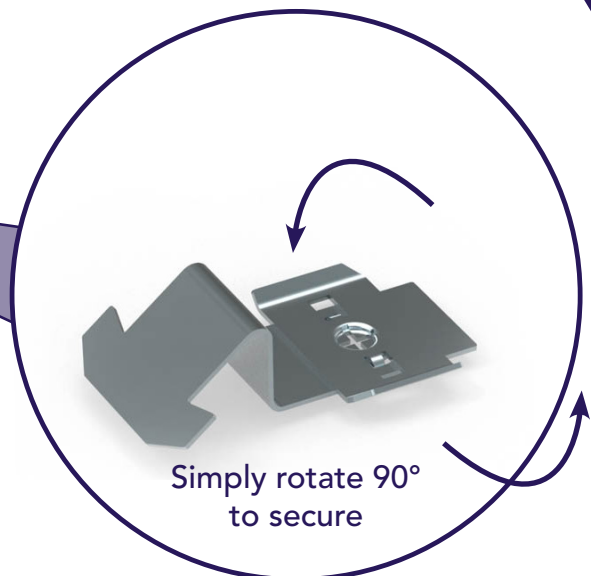

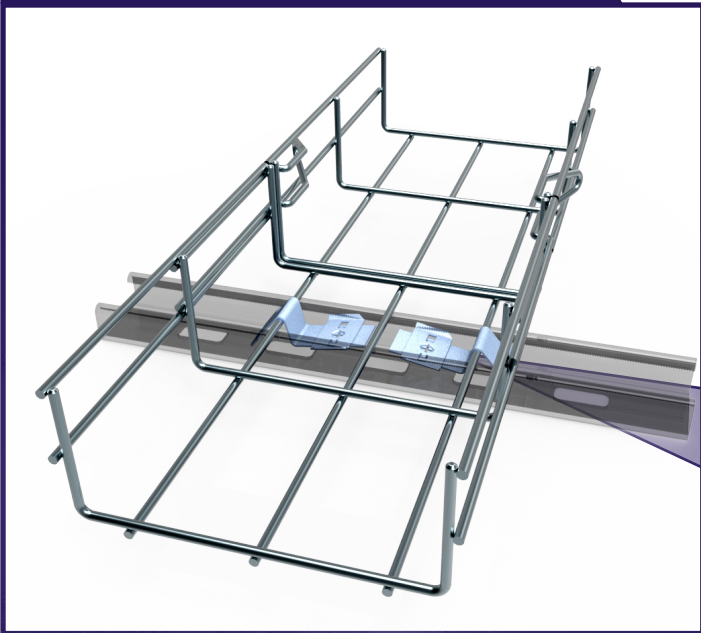

- ✓ STRENGTH
- ✓ ADAPTABILITY
- ✓ SPEED
- ✓ EASE OF USE

TIME SAVING SIMPLICITY

Forget about hold down plates, spring nuts and bolts - this simple klip secures basket to channel in seconds!

For best results use with Unitrunk's Intelok channel. Intelok®'s serrated return flange provides maximum slip resistance under a side load/impact.

BASKET TO CHANNEL KLIP

Part Code: UFC41M

SUSTAINABLE FOCUS FOR THE FUTURE

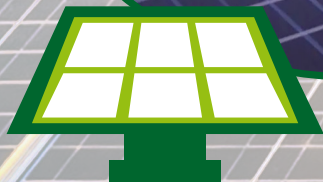

Sustainability has been a key element to innovation and design at Unitrunk from the beginning. Recently, we have taken a number of steps to further enhance our sustainable approach to business with the overall ambition to operate Net Zero manufacturing facilities by 2035.

NET 2
ZERO 0
by 3
5

The installation of **solar panels** at our Lisburn manufacturing site produces over 100kWh/day on average annually.

Energy harvested by the panels makes a considerable contribution towards our energy usage throughout our office and manufacturing facilities, all while reducing our company's carbon emissions and contributing to a cleaner environment.

We have installed solar panels across our entire depot network, meaning we are 70% of the way to operating off-grid.

Environmental Product Declarations (EPDs) are available for our products.

As the first cable management manufacturer to make EPDs available on their entire product range, we realise the importance of sharing transparent information on the environmental impact of our products.

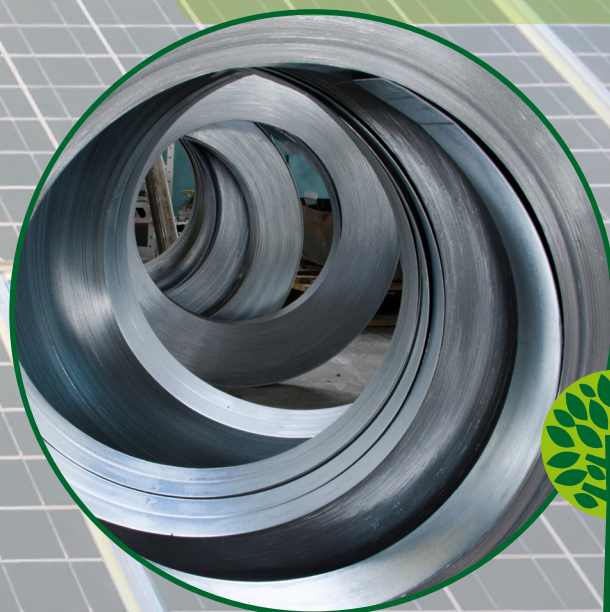

We're delighted to have transitioned to a fleet of hybrid and fully **electric vehicles** for our sales and warehousing teams operating throughout the UK and Ireland.

We have installed **EV points** at all Unitrunk Group locations for added convenience for our staff and customers.

We have made the switch to energy efficient **LED lighting** throughout all office and factory buildings, at both our manufacturing sites and throughout our branch network, in a continued effort to consume less energy throughout the business as a whole.

We're introducing **Green steel** into our material options. Green steel manufacture results in up to 95% reduction in CO₂ emissions when compared to traditional steelmaking processes.
